

Field Service Technician – Supportive and rewarding work environment!

This is a highly skilled position that represents the tip of the spear for AGS Manufacturing, Inc (AG Stacker). **The selected individual will gain specialized skills from working in the field and installing our innovative machines. They will get to meet our clients and train their machine operators on how to use our systems. Significant travel, up to 90%, is involved in this position. When not traveling, the individual will assist in machine assembly at our home shop location in Weyers Cave, VA.** The Service Technician will be working on their own in the field but can contact our home team for support. It is critically important that the selected individual uphold a high degree of professionalism due to face-to-face interactions with customers.

If you have electrician experience and would enjoy traveling across the US, we invite you to apply! Employees are provided competitive pay and a great benefits package.

AGS Manufacturing Inc. can evaluate standards of employment to anyone at any time.

Essential Work Activities

- Study blueprints, schematics, manuals, or other specifications to determine installation procedures.
- Inspect components of industrial/electrical equipment for accurate assembly and installation.
- Inspect equipment for defects, such as loose connections or frayed wires, and diagnose electrical problems.
- Test mechanical and electrical systems to ensure proper functioning.
- Repair or adjust equipment, machines, or defective components, and replace worn parts, such as gaskets or seals in watertight electrical equipment, to ensure optimal performance.
- Perform scheduled preventive maintenance tasks, such as checking and cleaning equipment.
- Coordinate efforts with coworkers involved in installing or maintaining equipment.
- Any miscellaneous duties that may be assigned from time to time.

Basic Skills Needed
